LynxNet Sign

SKU #950-LYNX-SIGN-2

Wall-Mounted Integrated Notification Solution

Benefits

The Lynx Systems LED Sign is a bright, visual notification device with **flashing LEDs** and a large text display for **emergency messages** and instructions. Ideal for high-visibility areas like lobbies and stairwells, it's fully customizable, is a **PoE+ network device**, and can be zoned to target specific buildings, **floors, or corridors for enhanced safety.**

Features

- **Ultimate Reliability:** Designed for continuous operation, ensuring critical alerts are always delivered.
- **Dual Notification:** Combines visual LED alerts with integrated audible alarms for comprehensive communication.
- **Customizable Text:** 1 or 2 lines, multi-size font and colors with scrolling and static text functions.
- **Cost-Effective:** Provides a high-performance solution at a fraction of the cost of conventional systems, with no recurring fees.
- **ADA Compliant:** Delivers both visual and audible notifications to meet accessibility standards.
- **LynxGuide Supervision:** Remotely monitored and controlled through the LynxGuide server for real-time status updates.
