

LynxNetPB - PP

1 Channel Supervised Network Duress Button

Built-in Gigabit network switch allows installation on network connections to existing devices

Output Devices

Features

- Install a LynxNetP anywhere on your network
- No PC Needed
- Simple installation - just power and network connection or POE
- Built in 1GB Network Switch
- 8 foot cable included
- Fully Supervised

The fully supervised **LynxNetPB** is a network duress button device that, when the duress button is activated it instantly sends an alert to the LynxGuide server via the network. Available Locking, requiring a key to re-activate. The activation and re-activation are recorded in the log files. Alerts sent to the LynxGuide server can activate messages to output devices such as pop up windows on networked computers, strobes, PA or radio systems, text pagers, email, and cell phones. The **LynxNetPB** panic button has a green LED to indicate it is communicating to the Lynxguide server over the network. When activated the LED turns amber.

Simple to install, has a built in network switch that allows using an existing device's network connection. 12VDC Wall transformer power supply included in PB model or available with power over ethernet (POE) PP model. The duress button attaches to the LynxNet with an 8 foot cable.

Ordering Information

LYNX-N-PB-M

Network Duress Button with power supply

LYNX-N-PB-L

Locking Network Duress Button with power supply

LYNX-N-PP-M

Network Duress Button with POE

LYNX-N-PP-L

Locking Network Duress Button with POE

Add Wall Mounted Button with cover:

LYNX-LHW-IDPNC-1

Add Wall Mounted Button without cover:

LYNX-LHW-IDPNC-2

Add the **LYNX-LHW-IDPNC-1** to the LYNX-N-PB-M or LYNX-N-PP-M and the network hardwired button is now wall mounted (with clear cover) with custom color and text.

Add the **LYNX-LHW-IDPNC-2** to the LYNX-N-PB-M or LYNX-N-PP-M and the network hardwired button is now wall mounted (with no cover) with custom color and text.
