

## Indoor IP 3 Color Situation Status Light

## LynxStrobe-C

The **LynxStrb-C** enables you to simply connect the solid Light to a network connection and power and be able to remotely change the light from **GREEN** to flashing **AMBER** or **RED** (programmable per alarm) depending on the area or room status via Lynx. Violence in the Emergency Department - a desktop icon, wall mounted button or any Lynx alarm can instantly change the color of the light. The occupancy status light of secure rooms in Behavioral Health or any other location can change based on procedures or events. **AC powered.** Activate a wireless wall mounted “**CODE SILVER**” alarm and instantly activate Status Lights around the location that flash RED to alert people to stay away.

**LYNX-STRB-C**

Lynx Indoor Light, Network, **GREEN, AMBER, RED**

**LYNX-STRB-D**

Lynx Indoor Light, Network, **GREEN, AMBER, RED** with speaker

## Indoor 4 Color IP Strobe with built in audible tone

## LynxStrobe-1

The **LynxStrobe** provides visual notification with audible tone of alerts via your network. The four colors Red, Yellow, Green, Blue are ideal for Codes, etc. The rugged steel construction and wall mountable design (vertical) make it ideal for lobbies, classrooms and other public areas. Simple to install, requires network connection and power. 12 VDC power supply is included. The LynxStrobe master can have up to 3 additional remote strobes connected to it within 100 feet – ideal for hallways and locations that all need to be activated at the same time. Works well with the color coded Lockdown, Shelter in Place, Evacuate and Lockout icons or other alarms.
