Lynx References from the Lynx October 2008 Catalog

"We have been using the LYNX networked Panic Alarm system in our hospitals for almost two years. We have found the LYNX system to be a great alternative to hard wired panic alarms. We have installed the system in three different facilities and have had very few problems. The LYNX systems is a much more cost effective way to handle panic alarms and can provide more detailed information than traditional hard wire panic alarms."

Roger L. Sheets CHPA
Director of Security
LifeBridge Health

_____

"We purchased the lynx system as an alternative to the high cost of installation with panic devices. We found that the cost for each panic and the ability to install with in 15 minutes was a great savings. The other nice piece that it works well with an IP camera. You can program the nearest IP camera to activate when the panic alarm is tripped. The bonus to this was the mass communication system that comes along with it. We use if for all of our emergency codes. We have pushed the messaging software out to all of the PC's at the hospital.
Technical Support is 110%. Very knowledgeable. Willing to answer any question and entertain any new ideas for the system. I have no complaints!"

Bob Hirsch
Sr. Systems Administrator and Assistant Manager of Security
LUHS

_____

"The Lynx Emergency Notification System is a very robust and flexible solution which allowed us to customize its setup to fit our campus needs."

Palm Beach Atlantic University

_____

"The fact that the Lynx system worked with our existing network and the support they provided made it easy to get the system up and running. We have been impressed by the variety of input and output devices we can integrate within the system. The Lynx system has proved to be a great benefit to our college."
