

LynxODPanic

Outdoor Wireless Panic Box

LynxODPanic

Lynx Messenger Popup on a PC

Output Devices

Lynx256 Wireless Receiver

Features

- Battery powered Outdoor Panic Button
- 1-3 Year battery life
- Simple installation pre-programmed to the Lynx256 receiver
- 900 Mhz Spread Spectrum
- Fully Supervised

The **LynxODPanic** is a battery powered, large, visible outdoor wireless Panic Box - ideal for parking lots, garages and remote areas. When the outdoor panic button is activated it sends an alarm messages via the Lynx256 wireless receiver and your network to the LynxGuide Server. It can activate any of the Lynx system output devices. The LynxODPanic has one channel that communicates through the 20 channel Lynx256 receiver allowing up to 20 LynxODPanic boxes to be used with one receiver. Optional Indoor or Outdoor 110V repeaters are available to expand wireless coverage area. The LynxODPanic is spread spectrum 900Mhz, fully supervised for low battery and loss of supervision.
