Alarm contact output

The LynxStrobe is a visual and audible network notification appliance. The LynxStrobe can receive instant alerts from any LynxSystem input device, including Desk top Icons, LynxKey Hot Keys software, LynxComPro hardwired USB panic buttons, LynxNet256 wireless panic button receiver, and the LynxNetHW hardwired input devices. LynxStrobe allows a quick and simple method for notifying personal in key locations through out your facility. Red, Yellow, Green, Blue are Ideal for Codes, etc.

The 950-LYNX-STRB-1 is the master strobe and supports up to 3 additional 950-LYNX-STRB-2 remote strobes connected to it within 100 feet – ideal for classrooms, nurse stations and lobbies and locations that all need to be visually notified at the same time. Requires a network and power connection.

Dimensions 13" (L), 4 1/8" (W), 3 3/4" (D)
