

# LynxAPI

SKU #780-LYNX-API-1

The LynxAPI is a REST JSON endpoint that allows any third party networked devices to activate alarms in the Lynx System. Additionally it allows Lynx to send alarm messages to the device with configurable parameters.

## Features and Benefits

- REST JSON API integration
- Send and receive data from other systems
- Integrates with third party systems

**Communication Protocol:** The Lynx API uses REST JSON HTTP as the communication protocol.
