

Hold Up Button (HUB) Locking

SKU #950-LHW-IDPNC-4

The hardwired HUB style button is simple to connect to any LynxNet input device. It instantly sends an alarm to the LynxGuide server. The locking style reset key requires a staff member to test the button manually, so they can reset the button with the reset key, after the test press.

Features and Benefits

- Hard wired HUB style button can be connected to any LynxNet input device
- One set of "Normally Open" and "Normally Closed" dry contact closures
- Wire integrity to the end point of the input device can be supervised using supplied EOL resistor
